Online Teaching

Interactive lecture material

Weekly live online tutorial sessions

3 weeks per year direct contact at UWE

Practical sessions, professional practice training

Clinical visits, support with portfolio completion

Assessment through a range of methods

Apprenticeship endpoint assessment

'The course has given me a huge opportunity with job progression. Learning on the job allows me to back up my hands-on experience in the NHS with learning the theory from the University. I can't emphasise enough how much this has helped with the understanding of the theory behind neurophysiology.' Rhys Morgan, Level 2 Student

For further course particulars, content and entry requirements, please email one of the contacts below

**All 3 years can be funded by the
NHS Apprenticeship Levy within English Trusts**
